INDIANA DEPARTMENT OF TRANSPORTATION INDIANAPOLIS, INDIANA 46204-2217

INTERDEPARTMENT COMMUNICATION

TO	
TO:	District Director
ATTENTION:	
	District Traffic Engineer
ATTENTION:	
	District Development Engineer
FROM:	
	Project Manager
SUBJECT:	Maintenance of Traffic for Metric-Units Project
	Route:
	Des.:
	Project No.:
	Bridge File:
	Location:
	County:
	Description:

We are preparing plans for the above noted project and are in the process of evaluating the relative merits of a temporary bridge and runaround, maintaining traffic through the project limits, or a detour during the construction period. In order that the District input may be considered in this decision, we ask that you complete the blanks in this memorandum and return it to:

(Design Engineer)
Indiana Department of Transportation
100 North Senate Ave., Room N642
Indianapolis, IN 46204-2216

If a detour is recommended, please submit the official detour map and signage with this memorandum with the blanks filled in. If the official detour route is totally over local roads, please initiate early coordination with the affected local public agency or agencies regarding the unofficial detour route.

The Engineer's Report for the project recommended that (a temporary runaround be used.) (traffic be maintained through the project limits.) (an official detour be used.)

The AADT during the construction year is _____

A. TRAFFIC-MAINTENANCE OPTIONS ANALYSIS

1. OPTION 1: TEMPORARY RUNAROUND

RUNAROUND COMPUTATIONS FURNISHED BY DESIGNER

Length of Runaround, m* x Cost per Meter**	m x \$=\$
Length of Temporary Bridge x \$3,000/m	m x \$3,000 = \$
or	
Cost of Pipe	\$
Total Runaround Cost (Total Cost Option 1)	\$

- * Length of Runaround = Distance from tie-in point to tie-in point minus Length of Temporary Bridge.
- ** For average fill height ≤ 2 m, use \$420/mFor average fill height ≥ 2 m, increase as necessary

2. OPTION 2: TRAFFIC MAINTAINED THROUGH PROJECT LIMITS

Length of Roadway Treatment, m* x	m x \$=\$
Cost per Meter*	
Length of Temporary Concrete Barrier x	m x \$=\$
Cost per Meter	
Cost of Crossovers	\$
Total Maintained-Traffic Cost	\$
(Total Cost Option 2)	

3. OPTION 3: INDOT ROUTES OFFICIAL DETOUR

Wha	t extra distance would be traveled by through traffic using this route? k
Wha	t percent of the traffic would use this detour route?
	is official detour route is used, what road(s) would be used as an unofficial route?

	Detour	CIAL DETOUR COMPU Through	Local
	Detour Duration (days)	<u> </u>	
	Extra Distance (km)		
	Vehicles per Day		
	User Cost per Kilometer	\$0.20	\$0.20
	Total User Cost	\$	\$
e.	User Cost = Detour Duration x Total User Cost = Through User = \$
